## Stainless Steel – Cooper finished Containers

### Stainless Steel Containers

Stylish Stainless Steel inner contains to hold food.

### 304 Grade

304 grade stainless steel is also comprised of no more than 0.8% carbon and at least 50% iron. The chromium binds oxygen to the surface of the product to protect the iron from oxidation (rust). Nickel also enhances the corrosion resistance of stainless steel. Therefore, the higher the nickel content, the more resistant the stainless steel is to corrosion.

### Food Grade – Stainless Steel

Stylish Stainless Steel inner contains to hold food instead of plastic containers. Thus preventing all health hazards caused due to plastic containers.

## 6 Hours Heat retention
